

# How to: Release Update

## BLOCKBIT UTM - version 1.3 to 1.4

### Start the migration

Make sure BLOCKBIT UTM version is 1.3.10. If necessary, update it:

1.

- Access the server's CLI interface and run the command "update - blockbit". Wait until update to version 1.3.10 is complete.
- To view the version, access the Web interface in the [Dashboard] -> [System] -> Widget "Information".

Information	
Hostname	master.blockbit.com
Device description	UTM MASTER
Version	BLOCKBIT UTM 1.3.10 build 18021409
Device model	BB-10000
System Time	01/03/2018 09:03:10
Uptime	21:40 hour(s)

2.

### Backup

From the backup, create a system snapshot (recommended). If you have any questions, please refer to the BLOCKBIT UTM user manual, item "8 Backup / Restore / Snapshot" (page 74).

3.

### Confirm update

Access the server's CLI interface and run the command "upgrade-blockbit". The command prompts you to continue the upgrade process with the following questions:

- "Are you sure to upgrade version 1.3 to 1.4? [y/N]", type "y" then Enter.
- "Are you sure to make a full backup system? [y/N]", type "y" then Enter.

4.

### Do not shut down!

Upon confirmation, the upgrade process will be initialized. This process will take a few minutes. DO NOT SHUT DOWN OR DISCONNECT THE EQUIPMENT.

5.

### Restart the system

At the end of the upgrade process, the system will reboot automatically.

6.

### Explore the new version

Clear your browser's cache to gain access to the new system resources.

### Count on our experts

If you need help, ask for your **BLOCKBIT Reseller**, who will be available to support you whenever needed.
